Startup Financial KPI Analysis

Dataset: synthetic/demo B2B SaaS data; USD; educational analysis only.

Period: 2024-01 to 2025-12

Revenue: $1,848 to $87,360 (+4626.0%)

ARR run rate: $1,048,318

Active customers: 37 to 1207

Latest blended CAC: $72

Estimated LTV / LTV:CAC: $1,577 / 22.04x

Latest gross margin: 91.11% (source field)

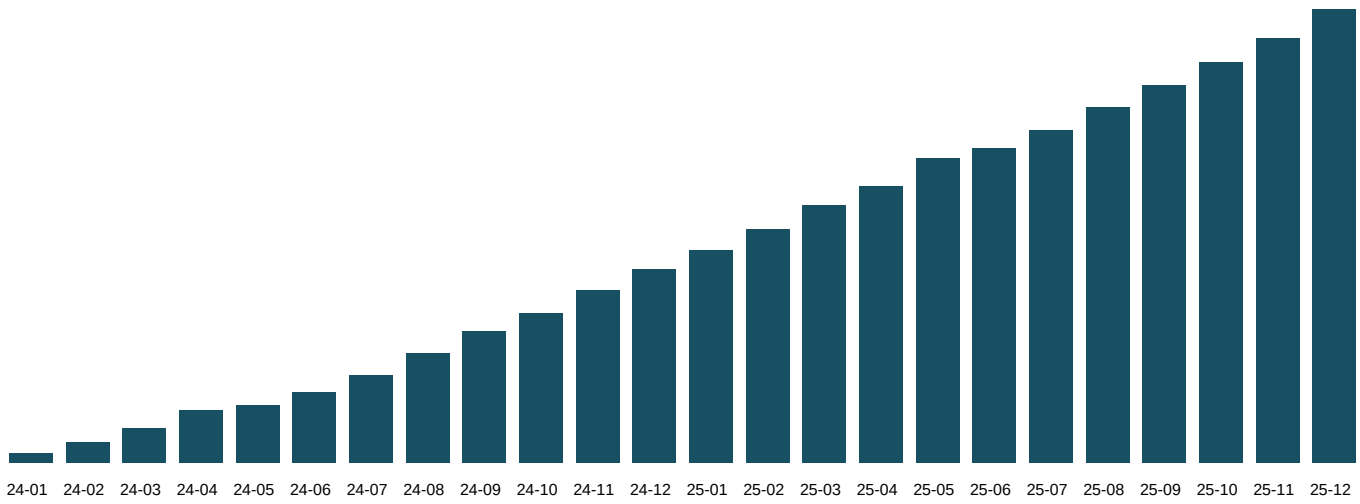
Ending cash: $633,930

Latest monthly net burn: -$52,065

First cash-generative month: 2024-08

Median month-12 cohort retention: 53.0%

Monthly revenue trend



Acquisition channel snapshot

Channel | customers | average estimated CAC | cumulative recognized revenue

Organic | 599 | $27 | $285,636

Paid Ads | 734 | $122 | $375,429

Partnership | 188 | $68 | $98,802

Referral | 396 | $38 | $209,638

Definitions and limitations: blended CAC = monthly marketing spend / new customers; channel CAC is customer-level estimated cost.
Net burn is reported as operating expenses minus revenue; negative values indicate cash generation in this dataset.
Gross margin and retention are reported from source sheets; synthetic data is not actual company financial information.
